Subject Index

α-casein-derived exorphins, physiological significance 35
acid microclimate pH 83
acid protease 257
active transport of peptides 83, 73
active site 257
activation parameters 205
acyl enzymes 197
acylation 197
alcoholism 91
alternate substrate inhibitor 213
alveolar type II cells 107
amide group pyramidalization and resonance destabilization 265
aminocephalosporins 83
analytical cell fractionation 121
angiotensin converting enzyme 57
animal collagenase inhibitor 197
antibiotics 73
anti-inhibitor rabbit serum 197
antileukoprotease 189
antinociception 57
arthritis 27
articualr cartilage 27
aspartic protease 257
azapeptide substrates 181
β-casein 35, 41
β-casein-derived exorphins 41
β-casomorphins 35, 41
  central effects in new-borns 35
  endocrinic regulation of pregnancy 35
  physiological significance 35
  postpartum psychosis 35
β-lactam antibiotics 125, 241
β-lactamase 241

barley 73
basal-lateral membrane 99
benzoxazinone (s) 213, 197, 205
bioactive fragments 65
  processing 65
biochemical characteristics 49
biologic order 281
biologically active peptides 73
biomolecular stability 281 (in solution)
biotechnology 141
bovine dental pulp 197
bovine dentin 197
bradykinin 73
  analogs 73
  antagonists 73
breast-feeding 35
brush-border 91
brush-border membrane 91
brush-border membrane vesicles 125

^{13}C NMR
  temperature dependence 273
  tunneling 273
CSF 65
CSF fractionation 57
carboxypeptidase B 135
carrier-mediated transport 125
casein-derived opioid peptides 41
  amino acid sequences 35
  effects 35
  origin 35
  physiological significance 35
casomorphins 91
cathepsin B 27
cefixime 125
cell cycle progression 3
cephalosporin 125
cerebrospinal fluid 65
characterizations of animal collagenase inhibitor 181

chemically induced injury 99
chondrocyte 27
chymotrypsin 151, 141, 273
clostripain 135
collagenase inhibitor 197
competition for peptide transport 73
complement system 11
convertases 65
cysteine 99
cytochrome C 125
cytochrome P450 $_{cam}$ 205
cytosolic 49

deacylation 197, 205
detoxication 99
diazoacetyl-DL-norleucine methyl ester 257
dibasic endoptotease 135
digestion 99
dipeptidyl peptidase IV 3, 19, 35 83, 181, 231
dipeptidyl peptidases 49
cDNA cloning 189
dynorphin 65
dynorphin A 65
dynorphin 1-8 135
dynorphin converting endopeptidase 57

EPNP 257
electrochemical proton gradient 91
endocytosis 83
enkephalinese 57
enteral nutrition 73
enterocytes 107
enthalpy-entropy compensation phenomena 177
enzymatic amidation 135
enzymatic peptide synthesis 141, 159
enzymatic syntheses of opioid peptides 135
enzyme 273
enzyme-assisted peptide synthesis 167
enzyme catalyzed hydrolysis 181
enzyme catalyzed peptide synthesis 151
enzyme partition 197
enzyme regulation 223
epoxide-reactive residue 257
1,2-epoxy-3(p-nitro-phenoxy) propane 257
"erepsin" 73
Escherichia coli 73
exorphins 91

fibroblast 27
food hormones 35
food peptides 35
"formones" 91
fractionation 49

gelatin 73
gene expression 189
gene synthesis 189
germinating barley 83
glandular kallikrein 57
glutathionuria 99
glycoprotein 197
glycylsarcosine 73

H^+/peptide cotransport 115
Hartnup disease 73
high pressure studies 223
hirudin 167
histochemistry 27
hormone biosynthetic precursors 141
human leukocyte elastase 213
hydrolase reactions 249

immune response 11
immunoelectron-microscopic localization 197
of animal collagenase inhibitor 181
immunohistochemical localization 197
of animal collagenase inhibitor 181
inflammation 11
inhibitor design 181
instabilities and phase separation 281
insulin 91, 125
insulin analogues 151
interleukin 2 19
intestinal absorption 99
intestinal permeability 99
intestinal transport 125
irreversible inhibition 205
isolated perfused nephron segments 121

kidney 91
kinetics 241
of peptide transport 73
knee joint 27
Kramer's assumption 213

LHRH 91
Leu- and Met- enkephalin 135
limited proteolysis 11, 141
low temperature studies 223
lymphocyte proliferation 3
lymphocyte subpopulations, human 19
lymphokine action 3
lysosomal activity 41

M-cells 91
macromolecular inhibitors 177
mammalian reproduction 41
mechanism-based inhibition 213
membrane hydrolysis 73
membrane potential 91
menadione 107, 99
metalloenzyme 49
microorganisma 83, 73

microviscosity 257
milk 35
molecular graphics 213
molecular mechanics 231
molecular modeling 231
molecular traps 135
myosin 205

Na^+stimulated 99
neurohyspsphysial hormone 135
neuromodulator 91
neurophysin 135
newborn mammals 35
noise-induced order 281
nucleases 141
nucleophile binding 151
nucleophilic attack 265

^{18}O induced isotope shifts 249
ophthalmic acid 99
opioid peptides 35, 41
osteoclast 27
oxygen exchange 249
oxytocin 135

P jump 205
pace-setters 205
paraquat 107, 99
pars convoluta 83
pars recta 83
partitioning of acyl-enzymes 159
penicillin amidase 141
pepstatin 257
peptidase(s) 57, 65, 91, 83
peptide(s) 91, 99, 141
  hormones 91
  synthesis 65
  transport 83, 99, 125
peptide-evoked potential 115
peptide-proton cotransport 91
percolation 281
permeability 91
placenta 49
plants 73
postproline-dipeptidyl-amino-
  peptidase 57
pregnancy 35
(pro)enzyme: inhibitor complexes 177
probenecid 99
processing enzymes 141
proenkephalin A 57
proenkephalin B 57
protease-catalyzed peptide
  bond synthesis 135
proteases, efficiency and
  specificity 241
protein(s) 141
  absorption 83
  design 135
  dynamics 223
  engineering 141
  mutants 135
  nutrition 73
proteinase 27
proteinase inhibitors 189
protolytic catalysis 273
proton inventory 189, 213, 205
proton transfer 265
proximal tubule 91
  cells 107
purification of animal
  collagenase inhibitor 181

quantum-chemical analysis 265
quinezolindiones 197

rabbit antiserum against
  animal collagenase inhibitor
  relaxation rates 205
radioimmunoassay 35
regulatory mechanism of
  collagenase activity 181
relative rates of absorption
  of peptides and amino acids 73
relaxation rates 205
renal
  brush border 121
  catabolism 121
  transport 121
ribonucleases 125
rotational behavior 57

S-peptide 125
S' characterization of '
  serine proteases 159
saliva 57
salivary glands 57
schizophrenia 91
Scytalidium lignicolum acid
  protease B 241
secretion 57
segmental localization 91
selective enzymatic hydrolysis 167
semisynthesis 141, 167
semisynthetic penicillins 151
serine enzymes 49
serine (pro) enzymes 159
serine proteases 11, 57, 213
serine hydrolase mechanism 189
serine protease mechanisms 265
site-bond correlated-percolation 281
small intestine 99, 107
sodium-potassium ATPase 83
sodium-proton exchanger 83
solid phase synthesis 73
solvent effect 223
solvent isotope effect(s) 205, 273
somatotropin 125
specificity 107
spin transition 205
spinodal decomposition 281
stability 167
staphylococcal nuclease 125
steric hindrance 213

steric interactions 197, 205
stoichiometry 115
structural requirements for
  peptide transport 73
submandibular glands 57
substance P 65
substance P converting
  endopeptidase 57
substituent effects 241
substrate reactivity 231
subtillisin BPN' 125
synovium 27

TRH 91
t-butylhydroperoxide 107, 99
tachykinin 57
thermodynamics 177
thiol-dependent enzyme 41
Thrombin 125
toxicity, in epithelia 107
transmural potential 115
transport 99
  kinetics 83
  peptides 83
"Triebkraft" 73
trifluoromethyl coumarin substrates
57
triggered isomerizations 205
trypsin 125, 151, 159

2-ureidbenzoates 197

vasopressin 91, 135
viscosity effect 213

water structure 281
γ-glutanyltransferase 99

zymographic membrane overlays 57
